

Behavioral Sciences

Department of Behavioral Sciences College of Arts, Sciences, and Letters

The Field

Behavioral Sciences is an interdisciplinary program encompassing the disciplines of anthropology, psychology, and sociology.

These disciplinary perspectives offer different but complementary views of people. In order to understand, predict or influence human behavior, one needs some comprehension of how humans develop, the problems they confront, the organization or structure in which they function, and how and why these go awry.

Career Opportunities

The Behavioral Sciences program is designed as a general preparation for a career in human services, such as social work, counseling, criminology, or health care. The program is based on the belief that it is important for an individual who plans to work with or for people to understand human beings as individuals (psychologically) within a social context (sociologically) which varies across cultures (anthropologically).

It is also critical to have some exposure to the methods employed by behavioral scientists and some actual experience in the working world of the human services. These are features offered in the Behavioral Sciences program.

The Major

Requirements are subject to change. Degree-seeking students will be subject to the requirements in effect at the time that they are admitted or re-admitted.

Prerequisites

The major requires the student to take three introductory-level behavioral sciences courses: Anthropology 101, Psychology 170 or 171, and Sociology 200 or 201.

Cognates

Behavioral Sciences majors must take six credit hours of upper level coursework outside of the behavioral sciences.

Requirements

The major requires a minimum of 30 upper-division (300 and above) credits in the Behavioral Sciences including at least two courses in psychology, two in sociology, and one in anthropology.

These courses must also include one course from each of the following categories:

Methods

ANTH 470	Doing Anthropology
PSYC 415	Laboratory in Developmental
