

THE FOUR SEASONS

BY: SABER ALGHATHIE

Leaves start to change color because of the fall season. Leaves also fall off the trees everywhere in the fall.

IN THE SPRING, RAIN FALLS DOWN AND MAKES PRETTY Pink FLOWERS GROW FROM THE GROUND.

**IN THE SUMMER, THE SUN SHINES VERY BRIGHT AND ALMOST
BLOCKS ALL OF MY SIGHT!**

I am smiling because I get to play outside all day in the summer!

Bears hibernate and sleep during the winter.

Birds have a hard time looking for food in the winter.

I think that seasons are a large part of our lives and plants and animals.

THE END☺
