SEASONS

<u>K</u>	<u>W</u>	<u>L</u>
We have 4 seasons. They are called fall, winter, Spring, and Summer.	How do we get seasons?	Not every area on earth has four seasons.
Each season has a different type of weather.	Why are they called spring, summer, fall, and, winter?	I learned how seasons affect our senses.
We have seasons all year.	Why do seasons change?	The tilt of the earth's axis affects our seasons.

Mrs. Awad-Jumah (cooperating Teacher)

Miss Jenan Abuzahria (Student Teacher)
